

OIL & GAS Fracking Product Line

Filling the pipeline with solutions.

*Products and services for complex application problems.
One stop for trouble-free operations.*

Lewis-Goetz offers the oilfield fracking industry the most complete line of products and services available.

Whether for critical frac hose applications that require higher working pressures, chemical hoses with multiple colors for identification and special fittings, or the availability of valves, unions and pipe fittings, Lewis-Goetz provides products designed for superior life, performance and safety.

To complement our product solutions, we offer unequaled field services to get customers quickly back up and operating.

INDUSTRIAL HOSES AND FITTINGS
